

cool. i want you to make me an a4 sized poster in colour. it will very prominently feature a good depiction of us\$1.00 and a british 10 pound note. it will highlight the legends on both. the standout motto will read: false gods and empty promises.

19 Apr 2025

I'll create an A4 poster design for you featuring a US \$1 bill and a British £10 note, with the motto "False Gods and Empty Promises" as the standout text. Let me create this as an SVG image for you.

False Gods and Empty Promises Poster
Image

The poster design features:

1. A dark background that makes the currency images and text stand out
2. The bold title "FALSE GODS AND EMPTY PROMISES" at the top in a striking font
3. A US \$1 bill with "IN GOD WE TRUST" highlighted
4. A British £10 note with "I PROMISE TO PAY THE BEARER ON DEMAND" highlighted
5. Red annotation lines drawing attention to these key phrases
6. A subtle dividing line between the two currency notes
7. A footer with the text "Currency: Symbols of Faith and Promise"

The design uses contrasting colors to emphasize the highlighted monetary legends and connects them visually to the main theme. The A4 dimensions are preserved in the SVG viewBox settings (595×842 pixels corresponds to A4 size at 72 DPI).

Would you like me to make any adjustments to the design?

surely we can get better depictions of the notes

19 Apr 2025

You're absolutely right - we can create much more realistic depictions of the currency notes. Let me make a more detailed SVG with better representations of both the US \$1 bill and the British £10 note.

False Gods and Empty Promises Poster - Enhanced
Image

I've created a much more detailed and realistic representation of both currency notes:

For the US \$1 bill:

- Added more accurate green coloring and ornate border patterns
- Included a simplified portrait of Washington in the center
- Added realistic elements like serial numbers, signatures, and denomination markers
- Featured the Treasury Seal
- Highlighted "IN GOD WE TRUST" with a gold overlay

For the British £10 note:

- Used the accurate deep pink/purple color of the polymer note
- Added the transparent window feature found on modern British notes
- Included a simplified portrait of the Queen
- Added serial numbers and signature of the Chief Cashier
- Highlighted "I PROMISE TO PAY THE BEARER ON DEMAND" text with a gold overlay

The connections between the two notes are more pronounced with stronger red indicator lines pointing to the highlighted text, and I've enhanced the typography of the main title "FALSE GODS AND EMPTY PROMISES" to make it more impactful.

Would you like me to make any additional improvements or adjustments to the design?

can you increase the font sizer to 20% (in god we trust

19 Apr 2025

I'll increase the font size of "IN GOD WE TRUST" by 20% to make it more prominent. Here's the updated poster:

False Gods and Empty Promises Poster - Enhanced

Image

I've increased the font size of "IN GOD WE TRUST" on the dollar bill by 20% (from 10pt to 12pt) and also expanded the highlighted background area to accommodate the larger text. This makes this important phrase more prominent on the poster, drawing more attention to one of the key elements that ties into your "False Gods" theme.

The highlighting box and position have been adjusted to ensure the text remains properly centered and visible against the background. The increased size helps emphasize the contrast between the religious statement on the US dollar and the promise of payment on the British pound.

Is there anything else you'd like me to adjust on the poster?
